Present to Speak

None

CIP review and possible changes to plan

After presentation of the combined CIP plan to the CIP committee, the CIP committee requested that the Emergency Services Efficiency Committee meet to re-evaluate the building part of the plan. The discussion involved timing, coordinating needs and future planning, and timing of funding. It was the consensus of the committee that funding of building planning for Willington Hill to catch up with the building planning of Willington 1 is essential and urgent. The planning will need to consist of coordination between the two projects to best serve the town as efficiently as possible. Both department buildings are nearing the end of useful life and have serious land space restraints. The mission of the Emergency Services in town continues to evolve and planning for foreseeable future programmatic changes need to be accounted for.

Adjournment

At about 8pm R. Knight called for adjournment. A. Moore second.
Unanimous Aye. Motion Passed.
