Sec. 7-148a. Compilations of ordinances and special acts; supplements.

Each town, city, and borough in this state shall print and publish all amendments to its ordinances, all new ordinances and all special acts adopted after June 1, 1962, on or before March first of each even numbered year as a cumulative supplement to the compilation of its ordinances and special acts, Such compilation and all supplements thereto shall be available for sale to the public at the office of the clerk or other similar office in such municipality at a reasonable cost to be determined by such municipality and a copy of each such compilation and supplement shall be deposited by the clerk of the municipality in the office of the secretary of the state, in the state library, in each bar library in the judicial district in which such municipality is located and in the courthouse library of the court nearest to such municipality. If any town, city, or borough fails to comply with the provisions of this section, the secretary of the state shall provide for the original compilation and publication of such ordinances and special acts or of any supplement thereto and such town, city, or borough shall be liable for the cost of such compilation and publication.

(1959, P.A. 430; 1961, P.A. 66; 281; February, 1965, P.A. 74-183, S. 175, 291; P.A. 76-436, S.155, 681; P.A. 78-280, S. 1, 127.)

History: 1961 acts set deadline of June 1, 1962, (formerly December 1, 1960) for completion of compilation; provided for depositing copies in various libraries, and required secretary of state to provide for compilation of ordinances, etc., if municipality fails to do so with municipality being responsible for the cost; 1965 act deleted obsolete reference to requirement that municipalities compile and publish ordinances and special acts before June 1, 1962, and specified subsequent ordinances and special acts be printed on or before March first of each even numbered year; P.A. 74-183 replaced circuit court with court of common pleas; P.A. 76-436 deleted reference to specific court class, stating that books be placed in nearest courthouse library, effective July 1, 1978; P.A. 78-280 substituted "judicial district" for county.

See Sec. 51-197b re administrative appeals.

Deposit of compilation of town ordinances in county bar library is directive and failure to do so does not invalidate such ordinances. 29 CS 59.

FLOOD DAMAGE PREVENTION ORDINANCE

Volume 7, page 182

SECTION I. STATUTORY AUTHORIZATION, FINDING OF FACT, PURPOSE AND OBJECTIVES

1.1 Statutory Authorization

In Section 7-148 (c)(7) of the General Statutes, the Legislature of the State of Connecticut delegates to local governmental units the responsibility of adopting regulations designed to promote the public health, safety, and general welfare of its citizenry. Therefore, the legislative body, known as the town meeting, of the Town of Willington, Connecticut, does ordain as follows:

1.2 Findings of Fact

The flood hazard areas of the Town of Willington are subject to periodic inundation which results in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base, all of which adversely affect the public health, safety and general welfare.

1.2.2 These flood losses are caused by the cumulative effect of obstructions in flood plains causing increases in flood heights and velocities, and by the occupancy in flood hazard areas by uses vulnerable to floods or hazardous to other lands which are inadequately elevated, flood-proofed, or otherwise unprotected from flood damages.

1.3 Statement of Purpose

It is the purpose of this ordinance to promote the public health, safety and general welfare and to minimize public private losses due to flood conditions in specific areas by provisions designed to:

1.3.1 Restrict or prohibit uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;

1.3.2 Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;

1.3.3 Control the alteration of natural flood plains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;

1.3.4 Control filling, grading, dredging and other development which may increase erosion or flood damage; and

1.3.5 Prevent or regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands.

1.4 Objectives

The objectives of this ordinance are:

1.4.1 To protect human life and health;

1.4.2 To minimize expenditure of public money for costly flood control projects;

1.4.3 To minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;

1.4.4 To minimize prolonged business interruptions;

1.4.5 To minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in flood plains;

1.4.6 To help maintain a stable tax base by providing for the sound use and development of flood prone areas in such manner as to minimize flood blight areas; and

1.4.7 To insure that potential home buyers are notified that property is in a flood hazard area.

SECTION 2. DEFINITIONS

2.1 Unless specifically defined below, words or phrases used in this ordinance shall be interpreted so as to give them the meaning they have in common usage and to give this ordinance its most reasonable application.

2.1.1 "Addition (to an existing building)" means any walled and roofed expansion to the perimeter of a building in which the addition is connected by a common load-bearing wall other than a fire wall. Any walled and roofed addition which is connected by a fire wall or is separated by independent perimeter load-bearing walls is new construction.

2.1.2 "Appeal" means a request for a review of the Zoning Enforcement Agents interpretation of any provision of this ordinance or a request for a variance.

2.1.3 "Area of shallow flooding" means a designated AO or VO Zone on a community's Flood Insurance Rate Map (FIRM) with base flood depths from one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and indeterminate, and where velocity flow may be evident.

2.1.4 "Area of special flood hazard" is the area within a community subject to one percent greater chance of flooding in any given year.

2.1.5 "Base flood" means the flood having a one percent chance of being equaled or exceeded in any given year.

2.1.6 "Basement" means that portion of a building having its floor subgrade (below ground level) on all sides.

2.1.7 "Breakdown wall" means a wall that is not part of the structural support of the building and is intended through its design and construction to collapse under specific lateral loading forces without causing damage to the elevated portion of the building or the supporting foundation system.

2.1.8 "Building" means any structure built for support, shelter, or enclosure for any occupancy or storage.

2.1.9 "Development" means any man-made change to improved or unimproved real estate, including, but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavating, drilling operations, or permanent storage of materials.

2.1.10 "Elevated building" means a non-basement building built to have the lowest floor elevated above the ground level by means of fill, solid foundation perimeter walls, pilings, columns (posts and piers), shear walls, or breakaway walls.

2.1.11 "Flood" or "flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

1. the overflow of inland or tidal water;
2. the unusual and rapid accumulation or runoff of surface waters from any source.

2.1.12 "Flood Hazard Boundary Map (FHBM)" means an official map of a community, issued by the Federal Emergency Management Agency, where the boundaries of the areas of special flood hazard have been defined as A zones.

2.1.13 "Flood Insurance Rate Map (FIRM)" means an official map of a community on which the Federal Emergency Management Agency has delineated both the areas of special flood hazard and the applicable risk premium zones.

2.1.14 "Flood Insurance Study" is the official report by the Federal Emergency Management Agency. The report contains flood profiles as well as the Flood Boundary Floodway Map and the water surface elevation of the base flood.

2.1.15 "Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot.

2.1.16 "Floor" means the top surface of an enclosed area in a building (including basement) i.e., top of slab in concrete slab construction or top of wood flooring in wood frame construction. The term does not include the floor of a garage used solely for parking of vehicles.

2.1.17 "Functionally Dependent Facility" means a facility which cannot be used for its intended purpose unless it is located in close proximity to water, such as a docking or port facility necessary for the loading and unloading of cargo or passengers, shipbuilding, ship repair, or seafood processing facilities. The term does not include long-term storage, manufacture, sales, or service facilities.

2.1.18

"Highest Adjacent Grade" means the highest natural elevation of the ground surface, prior to construction, next to the proposed walls of a structure.

2.1.19 "Lowest Floor" means the lowest floor of the lowest enclosed area (including basement). An unfinished or flood-resistant enclosure, usable solely for parking of vehicles, building access or storage, in an area other than a basement area is not considered a building's lowest floor.

2.1.20 "Manufactured Home" means a structure, transportable in one or more sections, which is built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term also includes park trailers, travel trailers, and similar transportable structures placed on a site for 180 consecutive days or longer and intended to be improved property.

2.1.21 "Manufactured Home Park or Subdivision" a parcel, or contiguous parcels, of land divided into two or more manufactured home lots for rent or sale.

2.1.22 "Mean Sea Level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

2.1.23 "National Geodetic Vertical Datum (NGVD)" as corrected in 1929 is a vertical control used as a reference for establishing varying elevations within the flood plain.

2.1.24 "New Construction" means structures for which the "start of construction" commenced on or after the effective date of this ordinance (not the revision date).

2.1.25 "Start of Construction" ("for other than new construction or substantial improvements under the Coastal Barrier Resources Act (P.L. 97-348)), includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, or improvement was within 180 days of the permit date. The actual start means the first placement of permanent construction of a structure (including a manufactured home) on a site, such as the pouring of slabs or footings, installation of piers, construction of columns, or any work beyond the stage of excavation or placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

2.1.26 "Structure" Means a walled and roofed building that is principally above ground, a manufactured home, a gas or liquid storage tank, other man-made facilities or infrastructures.

2.1.27 "Substantial Improvement" means any combination of repairs, reconstruction, alteration, or improvements to a structure taking place over a one (1) year period, in which the cumulative cost equals or exceeds fifty percent of value of the structure. The market value of the structure should be (1) the appraised value of the structure (using the cost approach to value) prior to the start of the initial repair or improvement, or (2) in the case of damage, the value of the structure prior to the damage occurring. For the purposes of this definition, "Substantial Improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include any improvement project required to comply with existing health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions.

2.1.28 "Variance" is a grant of relief from the requirements of this ordinance which permits construction in a manner otherwise prohibited by this ordinance where specific enforcement would result in unnecessary hardship.

2.1.29 "Water Surface Elevation" means the height, in relation to the National Geodetic Vertical Datum (NGVD) of 1929 (or other datum, where specified), of floods of various magnitudes and frequencies in the flood plans of coastal or riverine areas.

3.1 Lands to Which This Ordinance Applies

This ordinance shall apply to all areas of special flood hazard within the jurisdiction of the Town of Willington.

3.2 Basis for Establishing the Areas of Special Flood Hazards

3.3 Establishment of the Floodplain Development Permit

A Development permit shall be required in conformance with the provisions of this ordinance prior to the commencement of any development activities.

3.4 Compliance

No structure or land shall hereafter be located, extended, converted or structurally altered without full compliance with the terms of this ordinance and other applicable regulations.

3.5 Abrogation and Greater Restrictions

This ordinance is not intended to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this ordinance and another conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

3.7 Warning and Disclaimer of Liability

The degree of flood protection required by this ordinance is considered reasonable for regulatory purposes and is based on scientific and engineering consideration. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This ordinance does not imply that land outside the areas of special flood hazard or uses permitted within such areas flooding or flood damages. This ordinance shall not create liability on the part of the Town of Willington or any

officer or employee thereof for any flood damages that result from reliance on this ordinance or any administrative decision lawfully made thereunder.

Section 4. ADMINISTRATION

4.1 Designation of the Ordinance Administrator

The Zoning Enforcement Agent of the Town of Willington is hereby appointed to administer and implement the provisions of this ordinance.

4.2 Certification

Where required under this ordinance, a registered professional engineer or architect shall certify that the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of this ordinance. Such certification must be provided to the Zoning Enforcement Agent.

4.3 Permit Procedures

Prior to any development activities, application for a Development Permit shall be made to the Zoning Enforcement Agent on forms furnished by him or her. Such application shall be accompanied by two sets of plans drawn to scale showing, at a minimum, the property lines and locations of the parcel; existing and proposed contours; existing or proposed structures, fill, storage of materials, drainage facilities and the location of the foregoing. The following information shall also be submitted to the Zoning Enforcement Agent.

4.3.1 Application Stage

4.3.1.1 Elevation in relation to mean sea level of the proposed lowest floor (including basement) of all structures (Section 5.3.1);

4.3.1.2 Elevation in relation to mean sea level to which any non residential structure will be flood-proofed (Section 5.3.1.2.2);

4.3.1.3 Description of the extent to which any watercourse will be altered or relocated as a result of proposed development;

4.3.1.4 A statement as to whether or not the proposed alterations to an existing structure meet the criteria of the substantial improvement definition (Section 2.1.29);

4.3.1.5 A statement as to whether there will be dry access to the structure during the 100 year storm event;

4.3.1.6 Certification as to floodproofing, as required by Section 5.3.1.2.2;

4.3.1.7 Certification as the provisions of Section 5.3.2 governing fully enclosed areas below base flood elevation, if the minimum design criteria in Section 5.3.2.1- 5.3.2.3 is not used;

4.3.1.8 Certification as to floodway heights, as required by Sections 5.2.1 and 5.3.3;

4.3.2 Construction Stage

Upon completion of the applicable portion of construction the applicant shall provide the Zoning Enforcement Agent with verification of the as-built lowest floor elevation, defined as the top of the lowest floor (including basement) (Sections 5.3.1.1 and 5.3.1.2.1) or, in the case of floodproofed buildings, the elevation to which the floodproofing is effective (Section 5.3.1.2.2).

4.3.3 Compliance.

Deficiencies in the lowest floor elevations shall be corrected by the permit holder immediately and prior to further progressive work being permitted to proceed. Failure to submit an acceptable survey or failure to make corrections required hereby shall be cause for issuance of a stop-work order.

4.4 Duties and Responsibilities of the Zoning Enforcement Agent

In the administration of this ordinance, the Zoning Enforcement Agent of the Planning & Zoning Commission appointed to enforce this ordinance shall perform the following duties, among others:

4.4.1 Review all permit applications to determine whether proposed building sites will be reasonably safe from flooding.

4.4.2 Review all development permits to assure that the requirements of this ordinance have been satisfied.

4.4.3 Advise permittee that additional Federal or State permits may be required, and if specific Federal or State permit requirements are known, require that copies of such permits be provided and maintained on file with the Development Permit. Such additional requirements may include, but not be limited to: Stream Channel Encroachment Line Permit, Coastal Area Management Permit, Water Diversion Permit, Dam Safety Permit, Corps of Engineers 404 Permit.

4.4.4 Notify the regional planning agency and the affected municipality at least 35 days prior to the public hearing if any change of regulation or use of a flood zone will affect an area within 500 feet of another municipality.

4.4.5 Notify adjacent communities and the Department of Environmental Protection, Inland Water Resources Management Division prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Emergency Management Agency 6.

4.4.6 Assure that maintenance is provided within altered or relocated portion of said watercourse so that the flood carrying capacity is not diminished.

4.4.7 Record the elevation (in relation to mean sea level) of the lowest floor (including basement) of all new or substantially improved structures, in accordance with Sections 5.3.1.1 and 5.3.1.2.1.

4.4.8 Record the elevation (in relation to mean sea level) to which the new or substantially improved structures have been flood proofed, in accordance with Section 5.3.1.2.2.

4.4.9 Obtain and maintain all certifications required under this ordinance and assure that they meet the standards of Section 4.2 hereof.

4.4.10 Make the necessary interpretation, where needed, as to the exact location of boundaries of the areas of special flood hazard (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in this article.

4.4.11 Obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source (*) in order to administer the provisions of Section 5.2.3 and Section 5.3, when base flood elevation data or floodway data have not been provided in accordance with Article 3, Section B.

(*) (remove any statement to the effect of: "until such data is provided by FEMA")

4.4.12 Maintain all records pertaining to the provisions of this ordinance.

SECTION 5. PROVISIONS FOR FLOOD HAZARD REDUCTION

5.1 General Standards

In all areas of special flood hazard the following provisions shall apply:

5.1.1 New construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;

5.1.2 New construction and substantial improvements shall be constructed with materials resistant to flood damage;

5.1.3 New construction or substantial improvements shall be constructed by methods and practices that minimize flood damage;

5.1.4 Electrical, heating, ventilation, plumbing, air-conditioning equipment, and other service facilities shall be designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

5.1.5 New and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;

5.1.6 New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharges from the system into flood waters;

5.1.7 On-site waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during flooding;

5.1.8 In any portion of a watercourse which is altered or relocated the flood-carrying capacity shall be maintained;

5.1.9 Manufactured Homes.

All manufactured homes (including "mobile" homes placed on a site for 180 consecutive days or longer) to be placed or substantially improved, shall be:

5.1.9.1 Elevated so that the lowest floor is above the base flood elevation;

5.1.9.2 Placed on a permanent foundation which itself is securely anchored and to which the structure is securely anchored so that it will resist flotation, lateral movement, and hydrostatic and hydrodynamic pressures. Anchoring may include, but not be limited to, the use of over-the-top or frame ties to ground anchors;

5.1.9.3 Installed using methods and practices which minimize flood damage. Elevation construction standards include piling foundations placed no more than 10 feet apart, and the provision of reinforcement for piers more than six feet above ground level.

5.1.9.4 Adequate access and drainage should be provided.

5.2 Standards for Stream Without Established Base Flood Elevations and/or Flooding.

The Zoning Enforcement Agent shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source, including data developed pursuant to Section 6.4 of this ordinance, as criteria for requiring that new construction, substantial improvements, or other development in Zone A on the community's FIRM meet the standards in Section 5.3.

5.2.1 In A zones where base flood elevations have been determined, but before a floodway is designated, no new construction, substantial

improvement, or other development (including fill) shall be permitted which will increase base flood elevations more than one (1) foot at any point along the watercourse when all anticipated development is considered cumulatively with the proposed development.

5.2.2 Should data be requested and/or provided, the Town of Willington shall adopt a regulatory floodway based on the principle that the floodway must be able to convey the waters of the base flood without increasing the water surface elevation more than one (1) foot at any point along the watercourse.

5.2.3 Since the floodway is an extremely hazardous area due to the velocity of flood waters which carry debris and potential projectiles and have erosion potential, no encroachment including fill, new construction, substantial improvements, and other developments shall be permitted in a floodway unless a technical evaluation demonstrates that the encroachment will not result in any increase (0.00) in flood levels during the base flood discharge. All other Flood Plain District standards must also be satisfied.

5.3 Specific Standards

5.3.1 In all areas of special flood hazard A1-30, AE, AH where base flood elevation data has been provided, the following provisions shall apply:

5.3.1.1 Residential Construction

New construction or substantial improvement of any residential structure shall have the lowest floor, including basement, elevated at least one (1) foot above the base flood elevation.

5.3.1.2 Non-Residential Construction

5.3.1.2.1 New construction or substantial improvement of any commercial, industrial, or non-residential structure located in Zone A1-30, AE & AH shall have the lowest floor, including basement, elevated at least to one (1) foot above the level of the base flood elevation; or

5.3.2.2 Non-residential structures located in A zones may be flood proofed in lieu of being elevated provided that together with all attendant utilities and sanitary facilities the areas of the structure below the required elevation are water tight with walls substantially impermeable to the passage of water, and use structural components having the capability of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy. A registered professional engineer or architect shall review and/or develop structural design specifications and plans for the construction, and shall certify that the design and methods of construction are in accordance with acceptable standards of practice for meeting the provisions of this subsection. Such certification shall be provided to the Zoning Enforcement Agent as set forth in 4.3.1.6.

5.3.2.3 Require, for all new construction and substantial improvements, that fully enclosed areas below the lowest floor that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or architect or meet or exceed the following minimum criteria: a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided. The bottom of all openings shall be no higher than one foot above grade. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided that they permit the automatic entry and exit of floodwaters.

SECTION 6. STANDARDS FOR SUBDIVISION PROPOSALS

In all special flood hazard areas the following requirements shall apply:

6.1 All subdivision proposals shall be consistent with the need to minimize flood damage;

6.2 All subdivision proposals shall have public utilities and facilities such as sewer, gas, electrical and water systems located and constructed to minimize flood damage;

6.3 All subdivision proposals shall provide adequate drainage to reduce exposure to flood hazards; and

6.4 Base flood elevation data shall be provided for all subdivision proposals and other proposed development (including manufactured home parks and subdivisions) which are five acres or fifty lots, whichever occurs first, and are located in Zone A.

SECTION 7. VARIANCE PROCEDURES

7.1 The Zoning Board of Appeals as established by the Town of Willington shall hear and decide appeals and requests for variances from the requirements of this ordinance.

7.2 The Zoning Board of Appeals shall hear and decide appeals when it is alleged there is an error in any requirement, decision or determination made by the Zoning Enforcement Agent in the enforcement or administration of this ordinance.

7.3 Any person aggrieved by the decision of the Zoning Board of Appeals or any person owning land which abuts or is within a radius of one hundred (100) feet of the land in question may appeal within 15 days after such decision to the State Superior Court of Tolland, as provided in Section 8-8 of the General Statutes.

7.4 Specific Variances

7.4.1 Buildings on an Historic Register

Variances may be issued for the reconstruction, rehabilitation or restoration of structures listed on the National Register of Historic Places or the State Inventory of Historic Places without regard to the procedures set forth in the remainder of this section, except for Section 7.5.4.1 - 7.5.4.4 and provided the proposed reconstruction, rehabilitation, or restoration will not result in the structure losing its historical character.

7.4.2 Pre-Existing, Small Lot Location

Variances may be issued by a community for new construction and substantial improvements to be erected on a lot of one half acre or less in size which is contiguous to and surrounded by lots with existing structures constructed below the base flood level, in conformance with Section 7.5.4.1 -7.5.4.4.

7.4.3 Functionally-Dependent Uses

Variances may be issued for new construction and substantial improvement and other development necessary for the conduct of a functionally dependent use provided the structure or other development is protected by methods that minimize flood damage, creates no additional threat to public safety and meets the requirements of Section 7.5.4.1-7.5.4.4

7.4.4 Floodway Prohibition

Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.

7.5 Considerations for Granting Variances

In passing upon such applications, the Zoning Board of Appeals shall consider all technical evaluations, all relevant facts, all standards specified in other sections of this ordinance; and

7.5.1 The danger that materials may be swept onto other lands to the injury of others;

7.5.2 The danger to life and property due to flooding or erosion damage;

7.5.3 The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;

7.5.4 The importance of the services provided by the proposed facility to the community;

7.5.5 The necessity of the facility to waterfront location, in the case of a functionally dependent facility;

7.5.6 The availability of alternative locations which are not subject to flooding or erosion damage for the proposed use;

7.5.7 The compatibility of the proposed use with existing and anticipated development;

7.5.8 The relationship of the proposed use to the comprehensive plan and floodplain management program for that area;

7.5.9 The safety of access to the property in times of flood for ordinary and emergency vehicles;

7.5.10 The expected heights, velocity, duration, rate of rise and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and

7.5.11 The costs of providing governmental services during and after flood conditions including maintenance and repair of public utilities and facilities such as sewer, gas electrical and water systems, and streets and bridges.

7.5.2 Upon consideration of the factors listed above, and the purposes of this ordinance, the Zoning Board of Appeals may attach such conditions to the granting of variances as it deems necessary to further the purposes of this ordinance.

7.5.4 Conditions for Variances

7.5.4.1 Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief; and in the instance of a historical building, a determination that the variance is the minimum necessary as not to destroy the historic character and design of the building;

7.5.4.2 Variances shall only be issued upon (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship, and (iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisance, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.

7.5.4.3 Any applicant to whom a variance is granted shall be given written notice specifying the difference between the base flood elevation and the elevation to which the structure is to be built and stating that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced lowest floor elevation up to amounts as high as \$25 for \$100 of insurance coverage.

7.5.4.4 The Zoning Enforcement Agent shall maintain the records of all appeal actions and report any variances to the Federal Emergency Management Agency upon request.

SECTION 8. PENALTIES FOR VIOLATION

Violation of the provisions of this ordinance or failure to comply with any of its requirements, including violation of conditions and safeguards established in connection with grants of variance or special exceptions, shall constitute a misdemeanor. Any person who violates this ordinance or fails to comply with any of its requirements shall, upon conviction thereof, be fined not more than \$250.00 per day if proven done willfully and \$100.00 per day if not, or imprisoned for not more than 10 days for each day of violation, or both, and in addition, shall pay all costs and reasonable legal fees involved in the case.

Nothing herein contained shall prevent the Town of Willington from taking such other lawful action as is necessary to prevent or remedy any violation.

Adopted 03/20/91

It is the stated policy of this ordinance to effect the following:

1.1 To establish a schedule of fees whereby the approximate administrative costs for reviewing, evaluating and processing such applications are covered by such fees.

1.2 To ensure that the system of fees does not include municipal expenses incurred in negotiating with applicants for agreements, conveyances, conditions modifications or any other concessions desired by the municipality during the application process.

1.3 To encourage applicants to become familiar with municipal zoning and development regulations, to submit applications which comply with applicable regulations, and to submit plans, applications and proposals with fewer errors and omissions, thereby reducing municipal processing costs.

ADULT-ORIENTED BUSINESS ORDINANCE FOR THE TOWN OF WILLINGTON

Section I. Short Title

This ordinance shall be known as the “Adult-Oriented Business Ordinance for the Town of Willington”.

Section II. Policy Statement

The Town Meeting of the Town of Willington, Connecticut finds:

A. Adult-oriented establishments located in the Town of Willington require supervision from the Town’s Public Safety and Zoning Enforcement agencies in order to protect and preserve the health, safety, and welfare of the patrons of such establishments, as well as the health, safety, and welfare of the Town of Willington’s citizens.

B. Statistics and studies performed by a substantial number of cities and towns in the United States indicate that:

1. Large numbers of persons, primarily male, frequent such adult-oriented establishments, especially those which provide closed booths, cubicles, studios, and rooms for the private viewing of so-called adult motion pictures and/or video tapes and/or live entertainment; and

2. Persons under the age of eighteen (18) may be attracted to adult-oriented establishments and seek to enter or loiter about them without the knowledge or permission of their parents or guardians; and

3. Closed booths, cubicles, studios, and rooms within adult-oriented establishments have been used by patrons, clients or customers of such adult-oriented establishments for the purpose of engaging in certain sexual acts; and

4. Male and female prostitutes have been known to frequent such establishments in order to provide sex for hire to the patrons, clients or customers of such establishments within such booths, cubicles, studios, and rooms; and

5. Doors, curtains, blinds, and/or other closures installed in or on the entrances and/or exits of such booths, cubicles, studios, and rooms which are closed while such booths, cubicles, studios, and rooms are in use encourage patrons using such booths, cubicles, studios, and rooms to engage in sexual acts therein with prostitutes, thereby promoting and encouraging prostitution and the commission of sexual acts which cause blood, semen and urine to be deposited on the floors and/or walls of such booths, cubicles, studios, and rooms, which deposits could prove detrimental to the health and safety of other persons who may come in contact with such deposits; and

6. The reasonable regulation and supervision of such adult-oriented establishments tends to discourage such sexual acts and prostitution, and thereby promotes the health, safety, and welfare of the patrons, clients, and customers of such establishments.

C. The continued unregulated operation of adult-oriented establishments including, without limitation, those specifically cited at Paragraph 1 hereof, is and would be detrimental to the general welfare, health, and safety of the citizens of Willington.

D. The Constitution and laws of the State of Connecticut grant to the Town powers, especially police power, to enact reasonable legislation and measures to regulate and supervise adult-oriented establishments as hereinafter defined in order to protect the public health, safety, and welfare.

E. It is not the intent of the Town Meeting, in enacting this Ordinance, to deny any person rights to speech protected by the United States and/or State Constitutions, nor is it the intent of the Town Meeting to impose any additional limitations or restrictions on the contents of any communicative materials, including sexually oriented films, video tapes, books and/or other materials. Further, by enacting this Ordinance, the Town Meeting does not intend to deny or restrict the rights of any adult to obtain and/or view any sexually oriented materials protected by the United States and/or State Constitutions, nor does it intend to restrict or deny any constitutionally protected rights that distributors or
